or any of your favourite online bookstore**

Holograms on postage stamps have become a new topical subject in philately. The interest among philatelists in collecting such items has continued to increase. It is now more than 25 years since the first definitive postage stamp with a hologram was issued in Austria in 1988.

Provided in this book is a chronological review of worldwide issued postage stamps and souvenir sheets with holograms. A description of each stamp and souvenir sheet is provided together with colour photographs of them. In addition, official and special first-day covers (FDCs) with cachet holograms are also presented and described.

In this book the emphasis is placed on the holograms and their different types, on the hologram images, the producers and the story behind the stamps. Details about the items described, such as, size, identification numbers (Scott numbers), denomination, perforation and edition can be found in Tables at the end of the book. The extensive information provided about the hologram stamps with high-quality colour illustrations throughout the book cannot be found in any other philatelic or holographic publication.
