

**Zebra Imaging** (Was working on holography, no longer in business. Zebra Imaging sold its holographic print assets to HoloTech Switzerland AG effective September 30, 2017. For all holographic print inquiries, please go to [www.holotech3d.com](http://www.holotech3d.com). If you are interested in dynamic holographic Light-field Displays, please contact our subsidiary FoVI 3D)

**Holoxica** (Actually a company working on holography)

**ViewSonic Corp.** (Why this company? No products found matching holography)

**Qualcomm** (A VR company, nothing to do with holography)

**Musion Das Hologram Ltd** (world leaders in 3D “holographic” technology. Our patented 3D holographic projection system was first installed at the Swarovski Museum in Austria in 1996. Since then, we continuously pushed the boundaries of the technology continuing to amaze our clients and audiences alike. (This is a typically Pepper’s Ghost projection technique which is only 2D not 3D as claimed.)

**Konica Minolta Inc** (Fully integrated with the award-winning iFOIL technology featuring a process that creates a Meteor CMYK toner and the reflective qualities of foil —( including a rainbow spectrum of hues with metallic, glitter and holographic effects, but NOT holography)

**Realview Imaging Ltd.** (yes, this company can be included)

**Eon Reality Inc.** (I know this company, nothing to do with holography)

**AV Concepts** (Using “Holographic Effects” (NOT holography, but modern Pepper’s Ghost 2D projection technique.) “We work with holographic technology specialists **Rezin8**, who are best known for bringing **Tupac back to life at Coachella**. These experts provide access to their proprietary Liquid Scenic® projection hardware. “Holographic” stage performances never fail to make a statement.)

**Provision Holdings Inc** (HoloVision™ is a patented interactive merchandising and communications display system that enables consumers to see high visual impact 3D images or messages “floating in space” with no eye stress or special glasses needed. With the proper infrastructure, units equipped with the HoloVision technology can be networked within a store, a mall or across the country. (This is NOT a holographic technique).

**Many companies may freely use the term HOLOGRAM, though NONE of them are based on real, interference-based, holography.**
